

SCANNER APPEAL

OUR GOAL
£1,390,000
2020/21

YOUR DONATIONS WILL HELP US SAVE LIVES

Help us upgrade our Imaging Suite with new MRI, Ultrasound and CT Scanners for Lymington New Forest Hospital.

MRI £725,000

- Significantly shorter scanning time and superior imaging for abdominal scans.
- Up to 50% reduction in time that patients need to remain completely still in scanner.
- Improved experience for patients with claustrophobia.
- Increased reliability and availability of scanning time due to reduced servicing requirements.

ULTRASOUND £90,000

- Potential for development of 3D ultrasound imaging for certain scans.
- Improvement in image definition for diagnosis leading to reduction in requirement for further imaging (CT) for some patients.
- Reduced risk of musculoskeletal injuries for staff with lighter and more ergonomic machines.

CT £575,000

- Significant reduction in radiation dose (up to 80%), in particular for a CT of the chest.
- Improved image quality for patients with metallic implants (hips, knees).
- Potential for additional scans to be done more locally than travelling to other hospitals.
- Improved patient experience with faster scanning and reduced breath-holding times.
- Reduction in doses of intravenous contrast to enhance images.
